

Package ‘cancerdata’

April 8, 2015

Type Package

Version 1.3.1

Date 2011-10-26

Title Development and validation of diagnostic tests from
high-dimensional molecular data: Datasets

Author Jan Budczies, Daniel Kosztyla

Maintainer Daniel Kosztyla <danielkossi@hotmail.com>

Description Dataset for the R package cancerclass

Depends R (>= 2.10.1), Biobase

License GPL (>= 2)

biocViews Cancer, Microarray, Classification, Visualization

R topics documented:

cancerdata-package	1
VEER	2
VIJVER	3
YOUNG	4

Index	5
--------------	----------

cancerdata-package	<i>Development and validation of diagnostic tests from high-dimensional molecular data: Datasets</i>
--------------------	--

Description

This package contains dataset for the R package cancerclass.

Details

Package: cancerdata
Type: Package
Version: 1.1.0
Date: 2010-10-26
License: GPL (>=2)

Author(s)

Jan Budczies <jan.budczies@charite.de>, Daniel Kosztyla <danielkossi@hotmail.com>

```

VEER

Breast cancer gene expression data (van't Veer)

Description

Gene expression data from the breast cancer microarray study of van't Veer et al. [1]. The data set VEER includes gene expression values of 24481 genes in 78 tumor samples. The data set VEER1 is a filtered version [2] of VEER including gene expression values of 4948 genes in 78 tumor samples).

Usage

```
data(VEER)  
data(VEER1)
```

Value

Data and annotations are organized in a ExpressionSet of the package Biobase.

VEER	ExpressionSet
VEER1	ExpressionSet

VIJVER	<i>Breast cancer gene expression data (Vijver)</i>
--------	--

Description

Gene expression data from the breast cancer microarray study of Vijver et al. [1]. The data set VIJVER includes expression values of 24481 genes in 295 tumor samples. The data set VIJVER1 is a filtered version of VIJVER [2] including expression values of 4948 genes in 295 tumor samples.

Usage

```
data(VIJVER)
data(VIJVER1)
```

Value

Data and annotations are organized in a ExtresenSet of the package Biobase.

VIJVER	ExpressionSet
VIJVER1	ExpressionSet

YOUNG

Breast cancer gene expression data (van't Veer, young patients)

Description

Gene expression data from the breast cancer microarray study of van't Veer et al. [1]. The data set VEER includes gene expression values of 24481 genes in 19 tumor samples. The data set VEER1 is a filtered version [2] of VEER including gene expression values of 4948 genes in 19 tumor samples).

Usage

```
data(YOUNG)
data(YOUNG1)
```

Value

Data and annotations are organized in a ExpressionSet of the package Biobase.

YOUNG	ExpressionSet
YOUNG1	ExpressionSet
