Contents

1   Usage

To obtain the full path to the .bam file, use the `getPathBamFolder()` function:

```
> library(SCLCBam)
> getPathBamFolder()
```

```
/tmp/RtmpGOafxS/Rinst11325e238d2a31/SCLCBam/extdata
```

The .bam file is provided as experimental data for the *CopywriteR* package, which uses off-target reads from targeted sequencing for copy number detection.

2   Reference

The dataset was downloaded from the European Nucleotide Archive using the accession number PRJEB6954 using sample accession number SAMEA2697779, and off-target reads on chromosome 4 were extracted. The full .bam file containing data for all chromosomes can be downloaded from http://www.ebi.ac.uk/ena/data/view/SAMEA2697779.
