

Package ‘alpineData’

April 12, 2018

Title Data for the alpine package vignette

Version 1.4.0

Author Michael Love

Maintainer Michael Love <michaelisaiahlove@gmail.com>

Description A small subset of paired-end RNA-seq reads from four samples of the GEUVADIS project.

License GPL (>=2)

alpineData	<i>GAlignmentPairs for four samples from the GEUVADIS project</i>
------------	---

Description

FASTQ files for four RNA-seq samples from the GEUVADIS project were downloaded, aligned and constructed as `GAlignmentPairs`, according to the steps presented in `inst/scripts/make-data.R`

Usage

```
ERR188297(metadata=FALSE)
ERR188088(metadata=FALSE)
ERR188204(metadata=FALSE)
ERR188317(metadata=FALSE)
```

Arguments

`metadata` logical value indicating whether metadata only should be returned or if the resource should be loaded. Default behavior(`metadata=FALSE`) loads the data.

Format

`GAlignmentPairs`

Value

These accessor functions return `GAlignmentPairs` objects

Source

FASTQ files for four RNA-seq samples from the GEUVADIS project.
